Subject   ADSL2 MIB version 1.12

Hi,

The attached document includes the following changes (the first 2 were agreed today. The other were agreed before):
- Combined the init failure with VTU failures on both actual and maskable copies. Will eliminate a trap message.
- Revised the Trap Filter structure for ADSL2
- Revised several failure reasons.
- Corrected the sub-carrier masks definition.
- Updated several default values

There will be a separate document with all changes resulted from Brussels meeting.

Best regards,
Moti Morgenstern
